

Jhansi Bhukya

AI/ML Engineer | Full-Stack Developer

jhansibhukya17@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science (AI & ML) undergraduate with hands-on experience building and deploying AI/ML and full-stack applications across machine learning, NLP, computer vision, and backend systems. Skilled in Python, PyTorch, TensorFlow, FastAPI, React.js, Node.js, and MongoDB, with projects spanning self-supervised learning, audio classification, transformer-based NLP, and full-stack systems.

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT)

B.E. in Computer Science and Engineering (Artificial Intelligence & Machine Learning)

- CGPA: 9.72/10

Hyderabad, Telangana

Expected May 2027

EXPERIENCE

Aminobots

Data Science Intern

Remote

Jul 2026 - Present

- Selected for Aminobots' Data Science Practice, contributing across production projects including KidneyCare, Helm, TRACE, and PowerIQ while following secure data-handling and client confidentiality requirements.

PROJECTS

AI-Powered Respiratory Screening System | Live Demo | GitHub

- Developed a respiratory screening platform using SimCLR-style Self-Supervised Learning and EfficientNet-B0 for 4-class lung sound classification with Librosa, Mel-spectrograms, and Explainable AI.
- Built and deployed a FastAPI + React.js application with JWT authentication, prediction/history APIs, real-time visualization, and multilingual support; achieved sub-2-second response time, 10x faster audio loading, and 60% smaller visualization payloads.

Full-Stack Pizza Ordering Platform | Live Demo | GitHub

- Developed and deployed a full-stack ordering platform with JWT authentication, role-based access control, REST APIs, and MongoDB integration.
- Integrated Razorpay payments, inventory management, shopping cart functionality, and real-time order tracking for end-to-end order processing.

Mental Health QA System | GitHub

- Developed a transformer-based NLP question-answering platform with RESTful APIs, conversational analytics, and MongoDB for context-aware information retrieval and support.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, Self-Supervised Learning, Explainable AI

Frameworks/Libraries: PyTorch, TensorFlow, Scikit-Learn, Transformers, OpenCV, Librosa, NumPy, Pandas, FastAPI, React.js, Node.js, Express.js

Backend/Databases: REST APIs, MongoDB, MySQL, JWT Authentication, Role-Based Access Control

Core CS/Tools: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Git, GitHub, Postman

CERTIFICATIONS

- * Oracle Certified Associate: Agentic AI Foundations
- * Career Essentials in Generative AI - Microsoft / LinkedIn
- * Database Management Systems - Infosys Springboard
